

Ceiling insulation is one of the most effective ways you can make your home more comfortable and energy efficient.

Performance you can trust

High Performance Bradford Gold insulation

Enjoy all the benefits of Bradford Gold High Performance insulation

- Higher density for outstanding thermal performance
- Maximum savings on heating and cooling energy costs
- Low profile for optimum efficiency in tight spaces
- Low allergen
- Environmentally sound
- Fire resistant
- Meets the BCA energy efficiency requirements for all Australian climate zones
- Guaranteed for the life of your home

You deserve the best

When it comes to your family's comfort, don't compromise. Choose Bradford Gold High Performance insulation. It will keep them comfortable all year round while helping to reduce your energy bills and care for the environment.

Now that's a smart choice!

Bradford Gold insulation is manufactured under ISO 9002 Quality Systems and complies with AS4859.1 "Materials for the Thermal Insulation of Buildings". This is your assurance it will provide the level of performance stated on the pack.

Bradford Gold products are guaranteed for the life of your home, backed by CSR, one of Australia's oldest companies. Bradford Gold will not pack down, shrink, support mould, rot or deteriorate when installed in accordance with our directions.

When a Bradford approved installer installs your Bradford Gold batts, our guarantee also covers the installation workmanship.

BRADFORD GOLD HIGH PERFORMANCE

The ultimate insulation

The ultimate in comfort and energy efficiency

Bradford's new range of Gold High Performance insulation has been engineered to provide the highest levels of thermal performance available so you can choose the level of comfort your family deserves.

Once installed, the low profile, high performance batts act as a highly effective barrier to heat flow, keeping your home cool in summer and conserving precious warmth in winter.

Insulation performance is measured by the R-Value. The higher the R-Value the greater the resistance to heat flow through the insulation. With higher R-Values you need less energy to heat and cool your home to maintain a comfortable temperature.

Bradford Gold High Performance insulation products boast R-Values of R5.0 and R6.0, the highest level of insulation available for Australian homes.

When you select Bradford Gold High Performance for your home you will be helping to create the best possible environment for your family

Year round comfort and energy savings

Lately we've been experiencing concerning extremes in our weather patterns and the fact that Australian summers are getting hotter is well documented.

Bradford Gold High Performance provides a highly effective defence against the extremes. Its added density provides greatly increased resistance to the transmission of heat.

The flow of heat in and out of your home is reduced, keeping you more comfortable and minimising the need to run air-conditioners and heaters for long periods.

This all adds up to big potential savings in energy costs, year after year!

Low profile

You don't have to compromise your comfort in areas of your home with tight ceiling spaces such as under skillion roofs and in cathedral ceilings.

Bradford Gold High Performance has been engineered to provide high levels of insulation performance at thicknesses as low as 210mm.

Low allergen

Bradford is the only accepted insulation partner of the National Asthma Council Australia Sensitive Choice program. Bradford Gold insulation is suitable for use in the homes of asthma and allergy sufferers.

Helping the environment

Home energy use is one of the main contributors to greenhouse gas emissions and global warming. Reducing your consumption of energy for heating and cooling by installing Bradford Gold High Performance insulation is a positive action which is environmentally responsible. In fact Bradford Gold can save 12 times more energy each year than is used in its manufacture.

Bradford Gold insulation contains up to 80% recycled glass, which contributes to energy savings in manufacture and reduced landfill.

Best possible fire rating - 4 Zero

Bradford Gold Insulation achieves 0 for ignitability, 0 for spread of flame, 0 for smoke developed and 0 for heat evolved when tested to AS1530.3. These are the best possible ratings.

Bradford insulation will not burn and can actually hinder the spread of flame.

Meeting Australia's energy efficiency regulations

Energy efficiency regulations exist in the Building Code of Australia for all new homes in Australia. By installing Bradford Gold High Performance you can be sure you will meet or exceed the requirements regardless of where you live.

While there are no regulations currently in place for existing homes, Bradford strongly recommends Bradford Gold High Performance in ceilings; particularly if your home's exterior walls are uninsulated.
